

PRE-PLANNING VS. CRISIS PLANNING IN AGING

Sponsored by BrightStar Care® of Chattanooga

ABOUT THE SPEAKER

Peter Harrison, attorney at Chambliss Law Firm, works resourcefully to protect his clients' assets. His knowledge of supplemental needs trusts, pooled trusts and public benefits like SSI, SSDI and Medicaid (also known as Title 19) helps clients navigate the often confusing path to necessary care. With his strong background in issues affecting seniors and those with special needs, Peter guides clients through the challenges of living a normal life when impairments of age, injury or birth make you different.

COURSE DESCRIPTION

“Crisis Planning” is the legal profession’s term for the slim options left standing when a person and their family fail to anticipate or prepare for a sudden change in the health of a family member. Although crisis planning can work to get the care someone needs after a medical event, pre-planning for long term care usually has better results. In this session you will have the opportunity to review Case Studies and discover the improvements in results, costs, and time of pre-planning for long term care; the harsh realities of crisis planning; and the necessary steps and intensity in achieving each.
